investment (i.e., 52 per cent of the total foreign investment in shares) is considered as hedge fund investment.

In recent years, there have been several high-profile hedge fund collapses. The Long -Term Capital Management (LTCM) of the US failing in 1998 had threatened the very stability of the US financial system–looking at the level in impact the regulators managed a bail out for it to prevent an imminent financial collapse. In 2006, the world saw the collapse of another hedge fund in the US, the *Amaranth* which lost $6.5 billion in a month in the natural gas market (The fund in place of a bail out was closed down by the regulators with the investors losing heavily.)

HERFINDAHL INDEX

This is a measure of the level of seller concentration in a market which takes into account the total number of firms and their relative share in the total market output. Also known as *Herfindahl-Hirschman Index.*

HIDDEN PRICE REDUCTION

A quantitative or qualitative increase of a product by keeping the price unchanged. We see it taking place in the case of many goods in the market selling ‘20 per cent or 33 per cent extra’ at the same prices.

HIDDEN PRICE RISE

A quantitative or qualitative decrease in a product without changing the price.

HIDDEN TAX
