The cost a firm bears in changing the prices of its product–it includes retraining the sales staff, reprinting of the new price list, labelling of goods, and informing the customers about the price change. Higher menu costs discourage the firms going for frequent price changes.

MID-CAP FUNDS

Mutual funds launch sector-specific funds to attract investments. Similarly, they mobilise resources from investors with an objective of investing in mid-cap shares. The Fund Manager chooses the mid-cap shares that can become a part of the portfolio. His job is to outperform the benchmark like the CNX Midcap 200 indexes in terms of the returns. There are thousands of funds world over that focus on investing in medium or small-cap companies.

MFBS

In August 2007, the Reserve Bank of India released a Manual on Financial and Banking Statistics (MFBS), first of its kind, which works as a reference guide and provides a methodological framework for compilation of statistical indicators encompassing various sectors of the economy.

MID-CAP SHARES

There is no classical definition of mid-cap shares. The name ‘mid-cap’ originates from the term, *medium capitalised.* It is based on the market capitalisation of the stock. Market capitalisation is calculated by multiplying the current stock price with the number of shares outstanding or issued by the company. The definition of mid-cap shares can vary across markets and countries. In case of India, the National Stock Exchange defines the mid-cap universe as stocks whose average six months market capitalisation is between Rs. 75 crore and Rs. 750 crore. In the US, mid-cap shares are those stocks that have a market *capitalisation* of Rs. 9,000 crore
