A concept in game theory named after John Nash, a mathematician and Nobel prize winning economist, which occurs when each player is pursuing their best possible strategy in the full knowledge of the strategies of all the other players–once the equilibrium is reached, none of the players has any incentive to change their strategy.

NEO-CLASSICAL ECONOMICS

The school of economics based on the writings of Alfred Marshall (1842–1924) which replaced the classical economics by the 19th century, also known as the '*marginal revolution*'.

NEW PENSION SCHEME

Pension reforms in India have evolved primarily in response to the need of reform in the Government pension system. This had been designed to make a shift from defined-benefit to defined-contribution by putting a cap on Government's liability towards civil servants' pension. As a result of implementation of the New Pension System (NPS), all employees of the Central Government and Central autonomous bodies, with the exception of the armed forces, are now covered by this defined-contribution scheme with effect from January 1, 2004. Subsequently, 27 State Governments have notified and joined the NPS for their employees. The NPS to was opened to all citizens of India on May 1, 2009, on voluntary basis - the challenge is to spread the message of the NPS and old age income security to people in the unorganized sector across the country.

The pension fund managers manage three separate schemes, consisting of three asset classes, namely (i) equity, (ii) Government securities, and (iii) credit risk-bearing fixed income instruments, with the investment in equity subject to a cap of 50 per cent.
