NORKA

Indians work abroad and *remit* much of their earnings back home. Kerala is a state where non- residents contribute significantly to the state's resources. Keeping this important revenue channel in mind, the Government of Kerala launched the department of Non-resident Keralites' Affairs (NORKA) in 1996 to redress the grievances of Non-Resident Keralites (NRKs). NORKA is the ***first*** of its kind formed by any Indian state.

It makes efforts to solve the grievances raised in petitions for remedial action on threats to the lives and property of those who are left at home, tracing of missing persons abroad, compensation from sponsors, harassment from sponsors, cheating by recruiting agents, educational facilities for children of NRKs, introduction of more flights, assistance to stranded Keralites, etc.

NORKA has established *NORKA Roots* that acts as an interface between the NRKs and the Government of Kerala. Some important *objectives* are creation of a heritage village for parents of non residents, cultural exchange programmes, promotion of Malayalam language, employment mapping, maintaining a data base etc.

NORMAL GOODS

The goods whose demand increases as income of the people increases. It is just opposite of *inferior goods.*

NULL HYPOTHESIS

An idea that is put to the test. In econometrics, experts start with a null hypothesis (i.e. a particular variable equals a particular number), then crunch the data to verify it in accordance with the laws of *statistical significance.* The chosen null hypothesis is often just opposite to what the experimenter believes.
