Praise for Yuval Noah Harari

‘What makes [*Sapiens*] so interesting and provocative is that because it’s such a condensed sweeping history it talks about some core things that have allowed us to build this extraordinary civilisation that we take for granted, but weren’t a given, and it gives you a sense of perspective in how briefly we’ve been on this Earth’
Barack Obama

‘Here is a simple reason why *Sapiens* has risen explosively to the ranks of an international bestseller. It tackles the biggest questions of history and of the modern world, and it is written in unforgettably vivid language. You will love it!’
Jared Diamond

‘One of the best books I’ve read recently … Gives an excellent overview of how our species has developed’
Lily Cole

‘What’s unique about Harari’s take is that he focuses on the power of stories and myths to bring people together … I would recommend this book to anyone interested in a fun, engaging look at early human history … Harari tells our history in such an approachable way that you’ll have a hard time putting it down’
Bill Gates

‘One of my favourite writers and thinkers … He will blow your mind with how he tells our human history and looks into our future’
Natalie Portman

‘*Sapiens* is a starburst of a book, as enjoyable as it is stimulating’
Sunday Express
