1 For both the psychology and biochemistry of happiness, the following are good starting points: Jonathan Haidt, *The Happiness Hypothesis: Finding Modern Truth in Ancient Wisdom* (New York: Basic Books, 2006); R. Wright, *The Moral Animal: Evolutionary Psychology and Everyday Life* (New York: Vintage Books, 1994); M. Csikszentmihalyi, 'If We Are So Rich, Why Aren't We Happy?', *American Psychologist* 54:10 (1999), 821–7; F. A. Huppert, N. Baylis and B. Keverne (eds.), *The Science of Well-Being* (Oxford: Oxford University Press, 2005); Michael Argyle, *The Psychology of Happiness*, 2nd edition (New York: Routledge, 2001); Ed Diener (ed.), *Assessing Well-Being: The Collected Works of Ed Diener* (New York: Springer, 2009); Michael Eid and Randy J. Larsen (eds.), *The Science of Subjective Well-Being* (New York: Guilford Press, 2008); Richard A. Easterlin (ed.), *Happiness in Economics* (Cheltenham: Edward Elgar Publishing, 2002); Richard Layard, *Happiness: Lessons from a New Science* (New York: Penguin, 2005).
2 Daniel Kahneman, *Thinking, Fast and Slow* (New York: Farrar, Straus and Giroux, 2011); Inglehart et al., 'Development, Freedom and Rising Happiness', 278–81.
3 D. M. McMahon, *The Pursuit of Happiness: A History from the Greeks to the Present* (London: Allen Lane, 2006).
