“Harari’s account of how we conquered the Earth astonishes with its scope and imagination. . . . One of those rare books that lives up to the publisher’s blurb . . . brilliantly clear, witty, and erudite.”

—*The Observer* (London)

“Harari’s writing radiates power and clarity, making the world strange and new.”

—*Sunday Times* (London)

“This title is one of the exceptional works of nonfiction that is both highly intellectual and compulsively readable. . . . A fascinating, hearty read.”

—*Library Journal* (starred review)

“An encyclopedic approach from a well-versed scholar who is concise but eloquent, both skeptical and opinionated, and open enough to entertain competing points of view. . . . The great debates of history aired out with satisfying vigor.”

—*Kirkus Reviews* (starred review)

“Writing with wit and verve, Harari . . . attempts to explain how *Homo sapiens* came to be the dominant species on Earth as well as the sole representative of the human genus. . . . Provocative and entertaining.”

—*Publishers Weekly*

“It’s not often that a book offers readers the possibility to reconsider, well, everything. But that’s what Harari does in this sweeping look at the history of humans. . . . Readers of every stripe should put this at the top of their reading lists. Thinking has never been so enjoyable.”

—*Booklist* (starred review)

“Thank God someone finally wrote [this] exact book.”

—Sebastian Junger

“Tackles the biggest questions of history and of the modern world, and it is written in unforgettably vivid language. You will love it.”

—Jared Diamond

“In *Sapiens*, Harari delves deep into our history as a species to help us understand who we are and what made us this way. An engrossing read.”

—Dan Ariely

“Consistently engaging. . . . Harari writes prose that leaps from the page.”

—*New Statesman*
