15.89%, while laptops accounted for 10.74% of responses.

Another 10.36% selected other product categories. Audio products such as earbuds and speakers accounted for 6.28%, followed by refrigerators or washing machines at 5.14%. Air conditioners were selected by 3.63% of respondents, while smartwatches were the choice for 2.65%.

Over a third are considering purchases under ₹15,000

When asked about the budget for their primary purchase, 35.47% of respondents selected the under-₹15,000 category, making it the largest single budget bracket in the survey.

The remaining responses were distributed relatively evenly across the higher price ranges. 21.89% said they were considering spending ₹50,000 or more, while 21.64% selected the ₹15,000–30,000 range. Another 21.01% were considering a purchase between ₹30,000 and ₹50,000.

YouTube is the most popular source for product research

YouTube reviews were the most common way respondents said they research products before making a purchase during a sale. 36.84% selected YouTube reviews as their primary source.

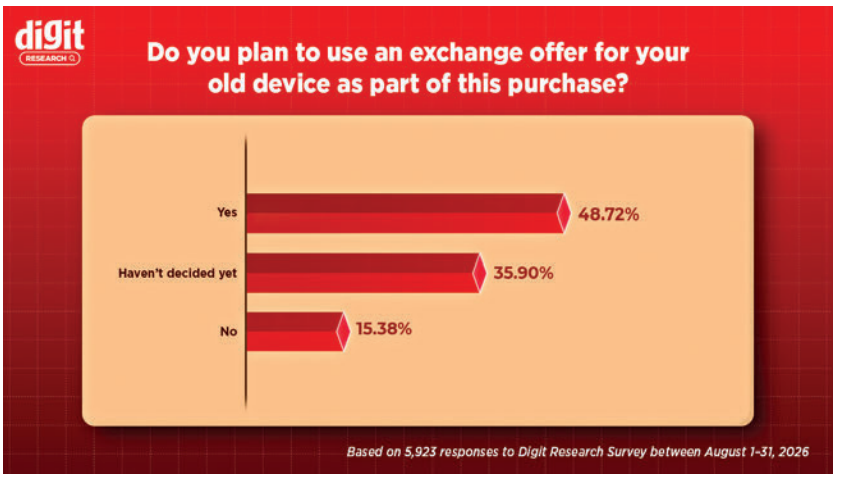

Tech news websites and articles were the second-most popular choice at 29.82%. Instagram and other social media platforms accounted for 14.04% of responses. Recommendations from friends and family were selected by 12.28%, while 7.02% said they primarily rely on in-store demonstrations before buying.

Flipkart's BBD ahead

Among specific sale events, 38.34% of respondents said they were most likely to purchase during Flipkart's Big Billion Days sale.

A further 24% said they would compare offers across all available platforms rather than committing to a particular sale. Amazon's Great Indian Festival followed at 21.66%.

Offline store festive offers accounted for 10.62%, while only 5.38% selected sales on a brand's own website.

One-third plan to pay the full amount upfront

34.29% of respondents said they are likely to make their purchase through full upfront payment. No-cost EMI was the second-most preferred payment method at 25.71%.

Cash on delivery accounted for 22.86%, while 17.14% said they would use credit card EMI.

Nearly half plan to use an exchange offer

Exchange offers are also expected to play a role in festive purchases. 48.72% of respondents said they plan to exchange an old device as part of their purchase.

However, a sizeable 35.90% have not decided yet. The remaining 15.38% said they do not plan to use an exchange offer.

73% have been disappointed by festive sale pricing

The survey also asked respondents about their experience with festive sale pricing in the past. 46.34% said they have been disappointed by festive sale pricing frequently, while another 26.83% said this has happened occasionally.

Meanwhile, 14.63% said they felt that festive sale deals had been genuine, while 12.20% said they had never really checked whether the pricing represented a genuine deal.
