BATTERY

Up to 36 hours of music playback with ANC off, up to 33 hours with ANC on and up to 25 hours of talk time with ANC off. These are the kind of battery figures that remove battery anxiety from the workday entirely. A full charge takes approximately 160 minutes via USB-C. A 15-minute quick charge provides up to six hours of use, which covers most emergency situations. For professionals who charge overnight and use the headset through a full working day, the battery is essentially a non-issue.

SOFTWARE AND FEATURES

The Jabra Direct software for Windows and Mac and the Jabra Sound+ app for iOS and Android gives you access to a comprehensive set of customisation options. A five-band EQ, adjustable ANC and HearThrough levels, microphone configuration, hearing protection settings and the MySound personalised hearing profile, which adapts audio output based on an in-app hearing test, and these are all accessible without any technical complexity. The busylight on the ear cup provides a visible signal to anyone in the room that you are on a currently on a call. On the Microsoft Teams variant, the Teams button gives direct access to the platform.

Multipoint Bluetooth 5.2 lets you connect to two devices at once, which is the right feature for anyone switching between a laptop and a smartphone throughout the day.

A WORD ON GAMING

The Evolve2 75 is not marketed as a gaming headset, but the same microphone engineering that makes it excellent for professional calls translates directly to team communication in multiplayer gaming. I used it for in-game communication with my teammate and the voice isolation and clarity are noticeably better than most gaming-specific headsets at a similar price. If you already own this headset for work, it doubles convincingly for gaming sessions without any adjustment needed.

VERDICT

The Jabra Evolve2 75 is a focused piece of professional equipment. The microphone system is its strongest feature and the call quality it produces in demanding acoustic environments sets it apart from most wireless headsets at this price. The battery life is excellent, the software support is thorough and the overall package is built around the needs of someone spending significant portions of their working day on calls. The ANC handles low-frequency noise well but does not suppress voices or high-frequency sound with the same effectiveness. The materials fall just slightly short of premium expectations and these are honest limitations of the category and the design as a whole, not failures of execution.

For professionals who need reliable, high-clarity voice communication across Teams, Zoom or any UC platform, the Evolve2 75 is built for the purpose it serves.

– Siddharth Chauhan

SPECIFICATIONS

Driver: 40 mm | Speaker max input: 30 mW | Speaker frequency range: 20 - 20000 Hz | Speaker Bandwidth (speak mode): 100 - 8000 Hz | Audio codecs: AAC, SBC | Microphones: 4 Analog and 4 Digital MEMS | Mic sensitivity: -35 dBv/Pa | Battery: 36 hours (ANC off) | Connectivity: USB-A/USB-C adapter, bluetooth 5.2
