39. Brains as computers – computers as brains. Artificial intelligence is now poised to surpass human intelligence.

---

*1 The formula takes a multiplication symbol because the elements work one on the other. At least according to medieval scholastics, you cannot understand the Bible without logic. If your logic value is zero, then even if you read every page of the Bible, the sum of your knowledge would still be zero. Conversely, if your scripture value is zero, then no amount of logic can help you. If the formula used the addition symbol, the implication would be that somebody with lots of logic and no scriptures would still have a lot of knowledge – which you and I may find reasonable, but medieval scholastics did not.

*2 In American politics, liberalism is often interpreted far more narrowly, and contrasted with 'conservatism'. In the broad sense of the term, however, most American conservatives are also liberal.
