right-angled triangle

A triangle with a right angle.

Examples

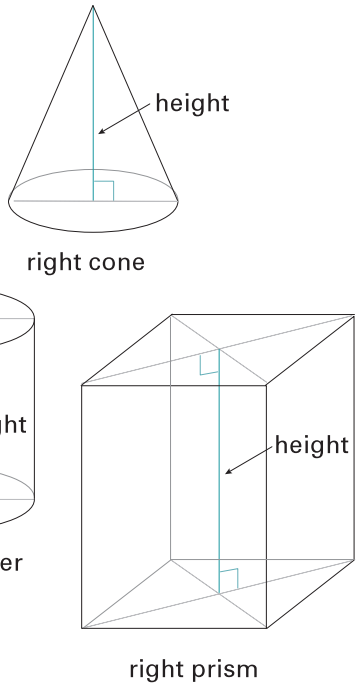

See hypotenuse, Pythagoras' theorem, right angle, tangent ratio

right 3D shape

A solid with ends or base perpendicular to height.

Examples

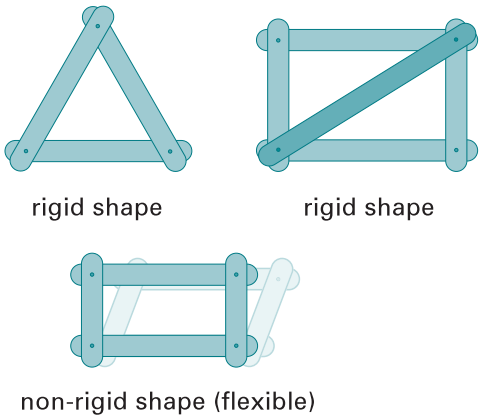

See cone, cylinder, prism

rigid

Not flexible. Stiff. A jointed structure is rigid when its angles cannot be changed (the struts will not move out of place).

A triangle forms a rigid structure.

Examples

See flexible

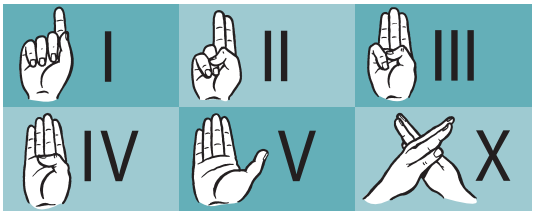

rise

See gradient

Roman numerals

An ancient system of numeration, where the numbers are represented by letters of the Roman alphabet.

The numerals are made up of a combination of these symbols.

I (1)
V (5)
X (10)
L (50)
C (100) centum
D (500)
M (1000) mille
