Example

For the fractions $\frac{1}{2}$ and $\frac{1}{3}$ a common denominator is 6, and also 12, 18, 24, etc.

6 is the lowest common denominator (LCD).

See denominator, fraction, lowest common denominator

common fraction

See simple fraction

commutative property of addition

The order in which two or more numbers are added does not affect the answer (sum).

Example

$$6 + 4 = 4 + 6$$
$$10 = 10$$

See associative property of addition, sum

commutative property of multiplication

The order in which two or more numbers are multiplied does not affect the answer (product).

Example

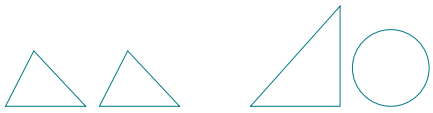

$$3 \times 8 = 8 \times 3$$
$$24 = 24$$

See associative property of multiplication, product

comparison

Identifying whether objects, measures or quantities are the same or different.

Examples

same objects different objects

same heights different heights

See division, ratio

compass

An instrument which shows direction. Used in ships, aeroplanes, etc.

Example

See bearing, direction

compasses

(pair of)

An instrument used to draw a circle and to mark off equal lengths. Often called a compass, for short.
