directed angle

The amount of turning from one ray (or arm of an angle) to the next, used in taking bearings.

Example

The directed angle (bearing) is N 40° E.

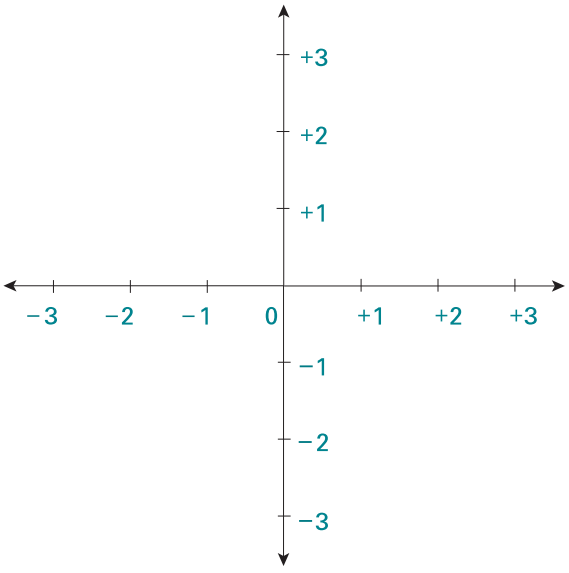

See arm of an angle, bearing, ray

directed numbers

Numbers that have + or – signs on them. They are also called integers. We can show them on a number line or axes.

Example

See integers

direction

(i) The way to go.

Examples

Left, right, up, down, above, below, inside, outside, near, from behind, forwards, backwards, etc.

(ii) Compass directions.

north	(N)
east	(E)
south	(S)
west	(W)
north-east	(NE)
south-east	(SE)
south-west	(SW)
north-west	(NW)

See anticlockwise, clockwise, compass

discount

If the price of something is reduced, it is sold at a discount.

Note: Discounts are often offered as a percentage of the selling price.

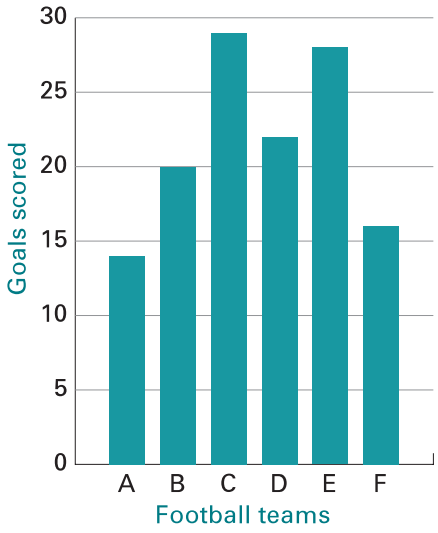

Example

discrete data

A set of data that can be counted. They are exact.

Example

See continuous data, data
