

kilogram

(Symbol: kg)

The base unit of mass.

1 kg = 1000 g

Examples

The mass of this packet of sugar is 1 kilogram.

The mass of this girl is 27 kilograms.

See gram, mass, unit of measurement

kilojoule

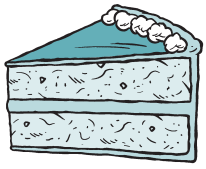

(Symbol: kJ)

Used for measuring energy or work.

1 kilojoule = 1000 joules

Example

A piece of chocolate cake has 2000 kilojoules.

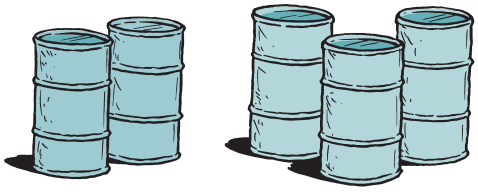

kilolitre

(Symbol: kL)

A unit of volume (capacity) for measuring liquids.

1 kL = 1000 L

Example

Five 200-litre oil drums hold one kilolitre.

See capacity, unit of measurement, volume

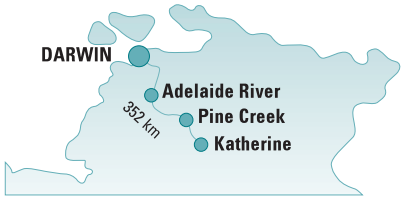

kilometre

(Symbol: km)

A unit of distance. Distances between towns are measured in kilometres.

1 km = 1000 m

Example

The road distance from Darwin to Katherine is 352 kilometres.

See distance, unit of measurement
