linear equation

An equation that can be presented as a straight line.

Examples

	A	B	C	D	E
x	−1	0	1	2	3
y	−4	−2	0	2	4

y = 2x – 2

See equation

line of symmetry

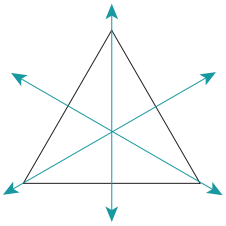

The line which divides something in half so that one half is the mirror image of the other half. This line is sometimes called an axis of symmetry.

A shape may have more than one line of symmetry.

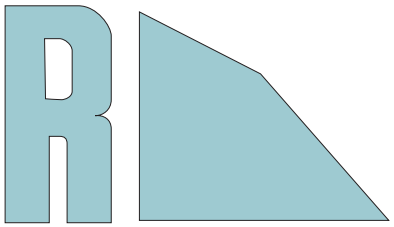

Examples

One line of symmetry

Three lines of symmetry

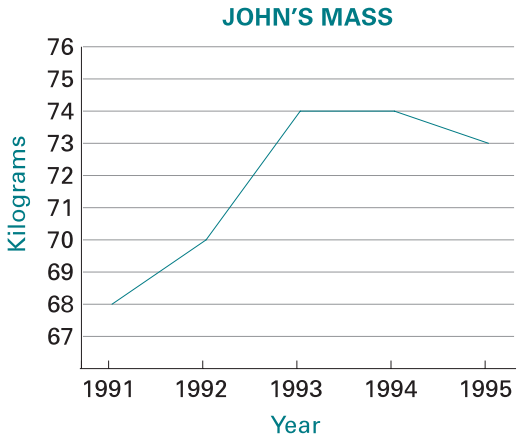

Some shapes have no line of symmetry.

See asymmetry, axis, symmetry

line graph

A graph formed by segments of straight lines that join the points representing certain data.

Example

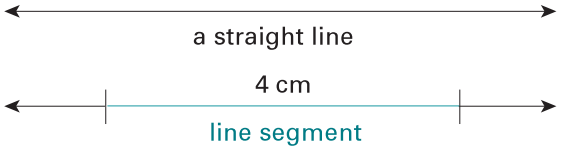

See graph, line, line segment

line segment

Part of a straight line.

Example

See diameter, line
