multiplication

(Symbol: ×)

Multiplication is repeated addition.

Example

 means

(i) 2 groups of 3, 2 × 3 = 6 or

(ii) 3 multiplied by 2, 3 × 2 = 6 or

(iii) 3 made 2 times bigger.

Sign × refers to two operations:

(i) lots of or groups of, and

(ii) multiplied by.

See addition, operation

multiplication facts

See table

multiplication property of one

When a number is multiplied by one, the product is equal to the original number. This is the multiplication property of one.

Examples

$7 \times 1 = 7$

$1 \times 138 = 138$

Use of the property is made when a fraction is converted to an equivalent form.

Example

$\frac{2}{3} = \frac{\square}{12}$

$\frac{2}{3} \times 1 = \frac{2}{3} \times \frac{4}{4}$

$= \frac{8}{12}$

$\frac{2}{3}$ has been multiplied by one

(or by $\frac{4}{4}$, which is equal to one)

See equivalent fractions

multiplier

The number by which another number is multiplied.

Example

$5 \times 7 = 35$

multiplicand multiplier product

See multiplicand, multiplication, product

multiply

Carry out the process of repeated addition or multiplication.
