2. Click the Create Role button.
3. Select the trusted entity type AWS Service and EC2, as shown in figure 3.9.
4. Proceed to the next step.

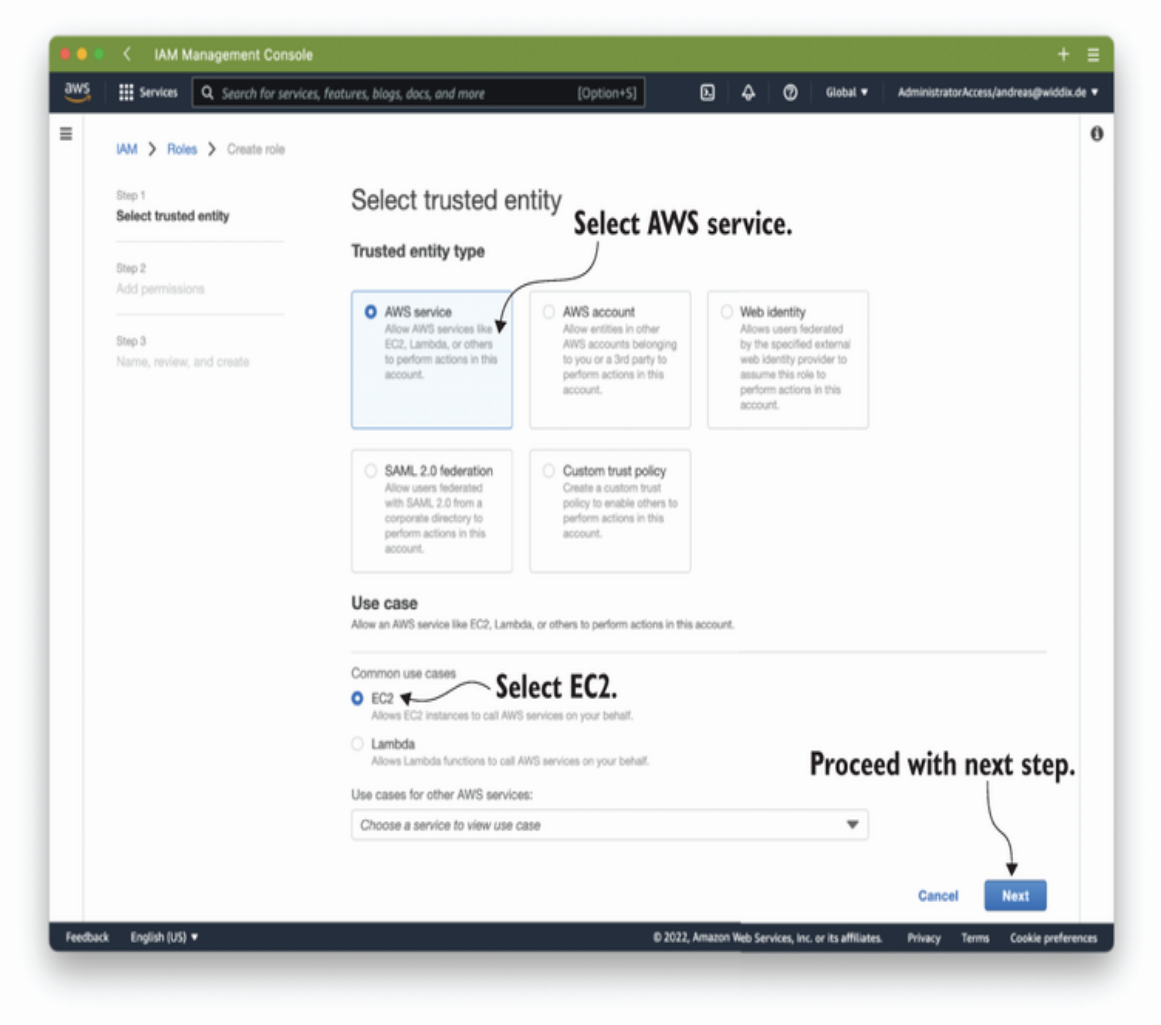

Figure 3.9 Creating an IAM role: Select trusted entity

Add permissions to the IAM role by filtering and selecting the policies named `AmazonSSMManagedInstanceCore`, as demonstrated in figure 3.10. Doing so is required so that the Systems Manager agent running on the
