We also want to make HTTP and HTTPS requests from the subnet to the internet. Keep in mind that we have no route to the internet yet. There is no way to access the internet, even with the NACLs. You will change this soon. The following NACLs are needed:

- Allow inbound ephemeral ports from 0.0.0.0/0.
- Allow outbound port 80 (HTTP) to 0.0.0.0/0.
- Allow outbound port 443 (HTTPS) to 0.0.0.0/0.

Find the CloudFormation implementation of the previous NACLs here:
