11.4.1 VPC: Network configuration

In section 5.5, you learned all about private networks on AWS. If you can't follow the next listing, you could go back to section 5.5 or continue with the next step—understanding the network is not key to get Discourse running.

Listing 11.2 CloudFormation template for Discourse: VPC

```
---
AWSTemplateFormatVersion: '2010-09-09'
Description: 'AWS in Action: chapter 11'
Parameters:                                          ①
  AdminEmailAddress:
    Description: 'Email address of admin user'
    Type: 'String'
Resources:
  VPC:                                               ②
    Type: 'AWS::EC2::VPC'
    Properties:
      CidrBlock: '172.31.0.0/16'
      EnableDnsHostnames: true
  InternetGateway:                                   ③
    Type: 'AWS::EC2::InternetGateway'
    Properties: {}
  VPCGatewayAttachment:                              ④
    Type: 'AWS::EC2::VPCGatewayAttachment'
    Properties:
      VpcId: !Ref VPC
      InternetGatewayId: !Ref InternetGateway
  SubnetA:                                           ⑤
    Type: 'AWS::EC2::Subnet'
    Properties:
      AvailabilityZone: !Select [0, !GetAZs '']
      CidrBlock: '172.31.38.0/24'
      VpcId: !Ref VPC
  SubnetB: # [...]                                   ⑥
  RouteTable:                                        ⑦
    Type: 'AWS::EC2::RouteTable'
    Properties:
      VpcId: !Ref VPC
  SubnetRouteTableAssociationA:                      ⑧
    Type: 'AWS::EC2::SubnetRouteTableAssociation'
    Properties:
      SubnetId: !Ref SubnetA
      RouteTableId: !Ref RouteTable
  # [...]
  RouteToInternet:                                   ⑨
    Type: 'AWS::EC2::Route'
    Properties:
      RouteTableId: !Ref RouteTable
      DestinationCidrBlock: '0.0.0.0/0'
      GatewayId: !Ref InternetGateway
    DependsOn: VPCGatewayAttachment
