- Find each other in Google Hangouts

Google Hangouts (and other video/voice chat services) does *synchronous decoupling*. It removes the need to be at the same place, while still requiring us to meet at the same time.

We can even decouple from time by using email. Now we must:

- Find each other via email

Email does *asynchronous decoupling*. You can send an email when the recipient is asleep, and they can respond later when they're awake.

Examples are 100% covered by the Free Tier

The examples in this chapter are totally covered by the Free Tier. As long as you don't run the examples longer than a few days, you won't pay anything for it. Keep in mind that this applies only if you created a fresh AWS account for this book and there is nothing else going on in your AWS account. Try to complete the chapter within a few days, because you'll clean up your account at the end of the chapter.

NOTE To fully understand this chapter, you'll need to have read and understood the concept of autoscaling covered in chapter 13.

In summary, to meet up, we have to be at the same place (the café), at the same time (3 p.m.) and find each other (I have black hair and I'm wearing a white shirt). Our meeting is tightly coupled to a location and a place. We can decouple a meeting in the following two ways:
