REST API to the user, and the workers process images.

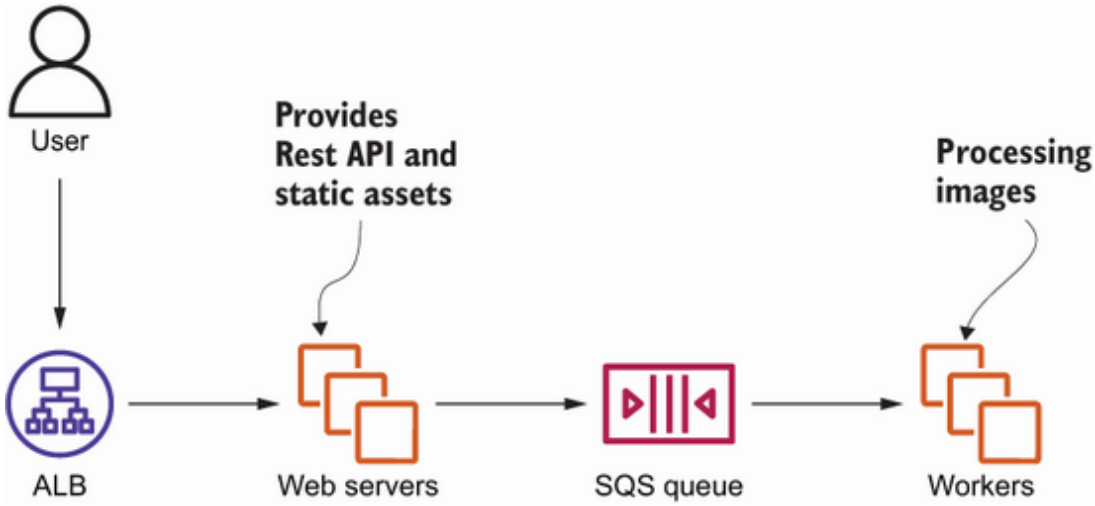

Figure 16.11 The Imagery application consists of two parts: the web servers and the workers.

Where is the code located?

As usual, you'll find the code in the book's code repository on GitHub: https://github.com/AWSinAction/code3. Imagery is located in /chapter16/.

The REST API will support the following routes:

- `POST /image`—A new image process is created when executing this route.
- `GET /image/:id`—This route returns the state of the process specified with the path parameter `:id`.
- `POST /image/:id/upload`—This route offers a file upload for the process specified with the path parameter `:id`.
