MemoryDB
access control 309 – 310
cluster and data access 310
configuration access 309
network access 309 – 310
cache deployment options 302 – 308
Memcached 303
MemoryDB 306 – 308
Redis 304 – 306
creating cache clusters 298 – 302
minimal CloudFormation template 298 – 300
testing Redis cluster 300 – 302
installing sample application with CloudFormation 311 – 319
cache 313 – 314
database 314 – 315
testing template 317 – 319
virtual machine 315 – 317
VPC 312 – 313
monitoring caches 319 – 321
host-level metrics 319 – 320
sufficient memory 320
updating Redis replication 320 – 321
Redis with persistence 306 – 308
tweaking performance 321 – 323
compressing data 323
selecting cache node type 321 – 322
selecting deployment option 322 – 323
memorydb-minimal stack 307 – 308
message queues, asynchronous decoupling with 399 – 408
architecture of URL2PNG application 401 – 402
consuming messages programmatically 404 – 407
limitations of messaging with SQS 407 – 408
producing messages programmatically 402 – 404
setting up message queues 402
turning synchronous process into asynchronous one 400 – 401
MeteredIOBytes metrics 259
MetricName attribute 364
MetricName parameter 475
MFA (Multi-Factor Authentication) 142 – 143
minimum parameter 470
MinLength property 124
