

FORMIDABLE FIREPOWER

Huge shockwaves spread across the water as the battleship USS *Iowa* fires a full broadside from her nine 16-in guns. One of the most heavily armed warships ever built, the *Iowa* entered US service in 1943 and participated in many of the key Pacific battles of World War II. Iowa-class battleships have since served in every major US conflict of the second half of the 20th century.
