modified atmosphere packaging 223, 225
modulation, in radio signals 181, 183
moka pots 113
molecules, water 111
moles 96
monitors 164
motherboards 162
motion 38
  laws of 62
motors **18–19**
  actuators 172
  electric 46–47, 57
  stepper 172, 173
  vacuum cleaners 118, 119
  washing machines and tumble dryers 130–131
mouse, computer 164, 166, **167**
movie projectors 151
MRI scanners **236–237**
multihulls 55
multilayer fabrics 127
muscle impulses 240
muscle power 40
muscle reinnervation 240
music 207
myoelectric prostheses 240

N

n-type (negative) silicon 160–161
nanoparticles 84
nanoscale 84–85
nanotechnology **84–85**
nanotubes 84
nanowires 84
naphtha 14
natural composites 80
near-field communication (NFC) 205
near-infrared light 220
nerve signals 240, 242, 243
nervous system 240, 242
networks
  computer 162, 196–197
  telecommunications **186–187**
neurons, and neural networks 170
Newton, Isaac 62
NFC (near-field communication) 205
nichrome 113
nitrates 219
noise, filtering in touch screens 205
nuclear power 10, **24–25**, 39, 57
nucleotides 245
nutrients 218, 219, 227
nylon 126

O

object beams, in holograms 148, 149
objective lenses 143
oculus 88
offshore drilling 90
oil
  drilling for 90–91
  refineries **14–15**
  spills **15**
OLED (organic light-emitting diode) 190–191
operating systems 168
optic nerve 243
optical fibers *see* fiber-optics
optical mice 166, **167**
optical sensors 119
optical signals 184
optical sorters 82, 83, 222, 223
orbiters 68
orbits, satellite 193
oscillations, of audio signals 140
oscillators, in telephone networks 184
output devices 164
ovaries 246, 247
oxidizers, in rocket engines 61
ozone layer 117

P

p-type (positive) silicon 160–161
pacemakers **232–233**
packets, data 196–197, 203
packing
  fresh products **222–223**
  processed foods 226
padlocks 122
Pantheon (Rome) 88
paper, recycling 82–83
parachutes 69
Parkinson's disease 242
particle guns 228
passive infrared (PIR) sensors 125
pasteurization 224–225
payment, contactless 207
pedals 40
permeable bagging materials 223
personal digital assistants (PDAs) 205
PET (plastic) 79
PET scans 237
petrochemicals 78
Petronas Twin Towers (Kuala Lumpur) 77
pharmaceuticals 229
phosphors 144, 145
phosphorus 160
photoelectric effect 30
photographic film 148
photon sails 69
photons 144, 145, 146, 147, 153
photosynthesis 220
photovoltaic (PV) panels 30
pickers, mechanical 217
pig iron 72, 73
pigs (GM) 229
piles 99
pills 87
pin chambers 122–123
pistons 42–43, 44, 45, 93, 120, 121
pitch (aircraft motion) 62
pixels 84–85, 150, 151, 152, 153, 155, 190, 191
planets, exploration 68–69
plant fibers 127
plasmids 228
plastics **78–79**
  3-D printing 86
  recycling 82–83
pod propulsion 57
pointers, laser 146
polar orbits 193
polarity 17, 18, 19, 111
pollution
  air 46
  oil 15
polyester 126
polyethylene 78, 79
polymers
  carbon fiber 80–81
  plastics 78–79
  synthetic fabrics 126
polypropylene 79
polystyrene 78, 79
Porsche, Ferdinand 46
Post Office Protocol (POP) 201
power **10–11**
  batteries 32–33
  electricity supply 22–23
  fuel cells 34–35
  generators 16–17
  in the home 106–107
  motors 18–19
  nuclear power 24–25
  oil refineries 14–15
  power stations 20–21
  solar power and bioenergy 30–31
  water and geothermal power 28–29
  wind power 26–27
  see also electricity
power drills 18–19
power grids 22–23, 30
power lines 22–23, 30
power stations
  coal-fired **20–21**
  nuclear **24–25**
power transmission 22–23
precipitators, in power stations 21
preservation, food **224–225**, 227
pressure sensors 173, 240
pressurization, in food preservation 225
prestressed concrete 77
primary radar 48
printers **154–155**, 164
  3-D 86–87
prisms, in binoculars 143
processors, computer 169
programs
  computer software 162, 168–169
  elevators 101
