Kingdoms of living things

Different features help scientists put all living things into groups. Here are the five major groups, called kingdoms, and some of the smaller groups that are within each kingdom.

Plants

Flowering plants

apple tree

rose

grass

Non-flowering plants

conifer

fern

mosses and liverworts

Fungi

mould

mushrooms

Protists

red algae

protozoan

Monera

bacteria

Molluscs

snail

oysters

Crustaceans

woodlouse

crab

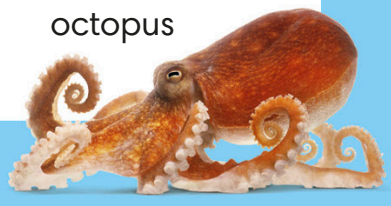

Arachnids

spider

tick

Cephalopods

squid

octopus
