use of force. This goes against the grain of recent work on Myanmar which tends to emphasize tensions and problems rather than shared support for solutions. The hope is that the ABS survey can stimulate further work that will build on its positive findings and help build momentum to reduce divisiveness and conflict in the future.

Notes

1 For good studies on ethnic conflict see for instance Callahan (2007); Fink (2008); Kyaw Yin Hlaing and Ganesan (2007); Smith (1999); South (2008); Walton (2008).

2 For more details regarding the Asian Barometer Survey please see: http://www.asianbarometer.org/. For the Global Barometer see: http://www.globalbarometer.net/.

3 The findings report associated with the fieldwork can be found here: <http://www.asianbarometer.org/survey/wave4-myanmar>.

4 For the technical report: <http://www.asianbarometer.org/survey/wave4-myanmar>.

5 Special thanks to Myat Thu and Myo Aung Htwe of the Yangon School of Political Science, the Myanmar field coordinators Arkar Soe and Nan Nan Thu Kyaw and supervisor and interview teams, as well as colleagues who comprised the Myanmar ABS Team, Huang Min-Hua, Wu Wen-Chin, Alex Chang, Tan Seng Keat, and leadership of the ABS, Yun-han Chu and Yu-Tzung Chang.

6 Along with Burmese, the survey was translated into Shan, Kachin, Mon, Rakhine, Chin, various Kayin dialects, and Mandarin by field interpreters as well as colleagues who comprised the Myanmar ABS Team, Min-Hua Huang, Wen-Chin Wu, Alex Chang, Tan Seng Keat, and leadership of the ABS, Yun-han Chu and Yu-Tzung Chang.

7 Two major surveys were released in 2014, a political poll by the International Republican Institute to be accessed via <http://www.iri.org/resource/iri-survey-burmese-strongly-support-democracy-express-satisfaction-over-country's-current/> and a survey by the Asia Foundation, Myanmar 2014: Civic Knowledge and Values in a Changing Society. <http://asiafoundation.org/publications/pdf/1445>.

8 Over half the respondents did not answer questions involving voting intention, higher than in other ABS surveys. Cross-regional analysis of the responses shows that the level of non-responsiveness was at least twenty per cent higher than other countries. For more details refer to the 2016 Myanmar ABS report.

9 The ethnic groups surveyed include Kachin, Jinghpaw (Kachin), Maru, Lashi, Kayah, Ka-Yun, Kayin, Sgaw Kayin, Shu, Chin, Saline, Mro, Bamar, Dawei, Beik, Mon, Rakhine, Shan, Eng, Kokant, Khamti Shan, Danu, Shan Gyi, Lahu,
