Process and Line Solutions for SMT Manufacturing

The process and line solutions of the ASYS Group enable electronics manufacturers worldwide to efficiently and reliably produce sophisticated products for key future industries such as automotive, communications, medical technology, and entertainment.

As a global technology partner, we support companies in rethinking their electronics manufacturing, advancing it intelligently, and optimizing it sustainably. From proven handling modules and high-precision printing and laser systems to singulation systems and intelligent manufacturing software, we offer holistic, perfectly coordinated solutions from a single source.
