Government notifies ₹1.27 trillion Semicon 2.0 scheme for semiconductor value chain

The Indian government has notified Semicon 2.0 with a ₹1.27 trillion outlay spanning chip design, semiconductor production equipment, fabrication, assembly, packaging, and testing, providing sustained policy support to expand manufacturing across the semiconductor value chain.

Semicon 2.0 shifts focus from fabs to a full chip ecosystem

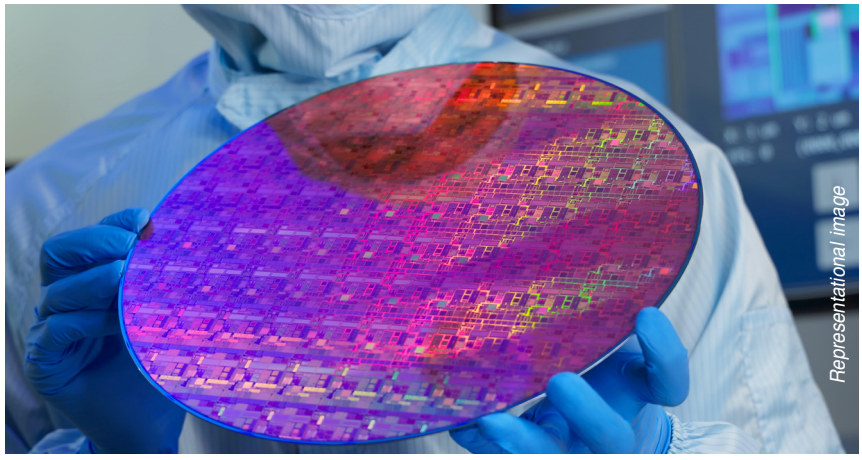

Semicon 2.0 cuts fab capex support to 40 per cent from 50 per cent under Semicon 1.0, while adding displays, packaging, equipment, materials, and commercial chip design. Union minister Vaishnaw called the lower support globally competitive; startups and MSMEs get seed funding up to ₹150 million.

India's semiconductor sector attracts $1.4bn in capital investment

India's semiconductor sector raised $1.4 billion in equity financing across 281 funded firms, $701 million since 2025, per Tracxn. Electronics manufacturing services attracted $313 million since 2025; total funding rose from $49 million (2021) to $473 million (2025).

SiCSem to set up ₹34.06 billion SiC semiconductor facility in Odisha

SiCSem will invest ₹34.06 billion in a 21.889-acre SiC facility at IDCO Infovalley-II, Khordha, Odisha, producing 4.8 million diodes and 91.2 million MOSFETs yearly. Funding includes a ₹7 billion central subsidy, ₹3.5 billion from Odisha, and ₹19.56 billion from promoters.

Nexperia partners with Tata Electronics for semiconductor manufacturing in India

Nexperia and Tata Electronics will manufacture Nexperia's MOSFET portfolio at Tata's upcoming 300mm Dholera fab, with assembly and testing at its Jagiroad, Assam facility. The partnership covers wafer fabrication, backend assembly, technology development, and ecosystem collaboration, strengthening India's semiconductor manufacturing and supply-chain capabilities.

Tata Electronics signs 16 MoUs to expand India's semiconductor supply chain

Tata Electronics has signed 16 MoUs with domestic and international firms covering wafer fabrication, packaging, materials, fab infrastructure, chip design, supplier development, and workforce training. The deals support its Dholera and Jagiroad facilities, which involve more than 450 ecosystem partners.

L&T Semiconductor, Tata Electronics to collaborate across Tata's India facilities
