India clears ₹1.1 trillion defence procurement

The Defence Acquisition Council has cleared capital acquisitions worth about ₹1.1 trillion, with approximately 98 per cent planned from Indian industry. Electronics-related items include Arudhra radars for the navy, ground-based multi-purpose jammers and electronic warfare systems for the Indian Air Force (IAF), and radio frequency identification (RFID)-based secure access cards for defence forces.

Update From EFY Group

A Full-Circle EFY Moment With Ashwini Vaishnaw

An interaction with Union Minister for Electronics and Information Technology Ashwini Vaishnaw at SEMICON India 2026 turned into a memorable moment for the EFY team, as he reflected on his longstanding association with Electronics For You.

Speaking with the EFY team, Vaishnaw recognised the magazine and encouraged EFY to further strengthen its digital presence. Referring to the Electronics For You YouTube channel, he asked the team to "start it" and, on learning that the channel was already active, added, "Then popularise it."

Union Minister Ashwini Vaishnaw with EFY's Akanksha Sondhi Gaur and Nidhi Agarwal

The exchange then took an unexpectedly personal turn as Vaishnaw recalled his student years and his familiarity with the magazine. "All of us electronics engineers used to love *Electronics For You*. We used to wait for it month after month. So many circuits would be there," he said.

Vaishnaw also remembered putting those circuits to practical use. "As a second-year student, I used to manufacture many of the circuits which would be there in your EFY and sell them. I used to be a good entrepreneur."

The recollection was a cherished reminder of the magazine's place in the practical, hands-on electronics journey of generations of engineers, students, makers, and electronics enthusiasts across India.

For EFY, the moment carried a quiet significance: decades after encountering the magazine as a student, Vaishnaw now leads the ministry responsible for shaping India's electronics and semiconductor ambitions. Perhaps that is the most rewarding measure of a publication's journey—seeing where its readers go.

PEOPLE (on the move)

Parth Jindal named chairman of JSW MG Motor India

JSW MG Motor India has appointed Parth Jindal chairman with immediate effect. A board member since the JSW Group-SAIC Motor joint venture's formation, he has worked on product strategy, manufacturing expansion, and localisation. He takes the top role as the automaker broadens its portfolio and scales up capacity.

ESIA appoints Olivier Janin as Director General

The European Semiconductor Industry Association has appointed Olivier Janin as Director General, effective September 1, 2026. A former Orgalim Deputy Director General with two decades of industry representation and association management experience, he will lead ESIA's work on investment, scale-up, research, supply-chain resilience, skills, and sustainability.

Indium Corporation promotes Hongwen Zhang to R&D Director

Indium Corporation has promoted Hongwen Zhang, PhD, to R&D Director, leading technology development, product road-mapping, and materials portfolio advancement. Reporting to CEO Ross Berntson, he joins the management team after serving as Senior R&D Manager, Alloy Group. Ross has been with Indium since 2008.

Amber Enterprises Hires Satendra Singh as New CEO of Electronics Division

Amber Enterprises India has appointed Satendra Singh CEO of its electronics division. With over three decades of experience in business leadership and global operations, including at Nokia, Flex and, most recently, Syrma SGS, he will focus on scaling the division and strengthening capabilities.
