IN SHORT

- Radbon Electronics earns IPC/WHMA-A-620 QML validation for high-reliability manufacturing
- BRICS and UAE ties open new opportunities for Indian tech
- Ultraviolette to build major EV factory in Tamil Nadu
- ThunderPlus launches 0.5MW EV charging station on NH-16
- Videotex secures Google certification, targets $85M revenue
- Yuma Energy secures $35 million to scale EV battery swapping in India
- Raptee.HV, Rajalakshmi Engineering College launch EV centre of excellence
- TriLite Technologies partners with AAC Technologies to scale laser beam scanning displays
- Agnikul Cosmos opens new facilities to advance reusable rocket development
- Broadband equipment sales slip as operators pull purchases forward
- AMD and Delhi University partner to upskill 10,000 students in AI
- Jensen Huang urges G20 ministers to build AI infrastructure
- China curbs robotic companies' IPOs after Unitree's volatile debut
- Pulsiv appoints Tim Joyce as CEO to lead commercial expansion
- POWERCON appoints Ravindra Chauhan to drive renewable energy business growth
- Tasking, dSPACE join forces for defence software
- Novamax Technologies to invest ₹2 billion in new DMIC plant
- Jubilant Ingrevia to acquire 40% stake in Zettaone Technologies for ₹1.89 billion
- LeanWatts secures $2m seed capital to boost production
- LTTS launches LTTS farm to accelerate deep-tech startup commercialisation

HFCL bags $244 million export order for optical fibre cables

HFCL has secured a $244 million export order for high-quality, high-fibre-count optical fibre cables (OFCs) from a global multinational. The three-year agreement, running until December 2029 with supply from 2027 via HFCL's overseas subsidiary, adds multi-year revenue and strengthens its position in the global OFC market.

INTERNATIONAL news

PCBAA calls on Pentagon to secure PCB supply chain by 2027

US PCB body PCBAA has urged the Pentagon to hold to the January 1, 2027 deadline for a plan to remove Chinese, Russian, Iranian, and North Korean content from critical defence supply chains. It says domestic PCB and PCBA manufacturing is essential for secure microelectronics.

Microchip, Marelli push open-standard displays for SDVs

Microchip Technology and Marelli have demonstrated an ASA Motion Link-based display connectivity solution for software-defined vehicles transmitting graphics and video from central computers to automotive displays. Using Microchip's VS7000 chipset, the system supports data rates up to 16Gbps, authentication, encryption, lossless transmission, and lower power consumption while reducing reliance on proprietary SerDes technologies.

US backs Africell with $100m loan to counter Huawei in Africa

The US Export-Import Bank will lend nearly $100 million to Africell, Africa's only American-owned telecom firm, for mobile-network technology from American and allied suppliers, countering Huawei, which holds about 52 per cent of Africa's 5G infrastructure market (Counterpoint Research). Africell serves 15 million customers.

China targets 30 trillion yuan electronics manufacturing revenue by 2030

China's 2026-2030 electronics plan targets over 30 trillion yuan (US$4.48 trillion) in industry revenue by 2030, with R&D investment intensity reaching 3.5 per cent. Priority areas include integrated circuits, advanced computing, consumer and energy electronics, intelligent terminals, and optoelectronics, alongside AI-driven innovation, BeiDou Satellite Navigation System expansion, and autonomous-driving systems.

Harwin expands high-reliability portfolio with KEC acquisition

Harwin has acquired UK-based KEC Limited, established in 1979, adding EMC backshells, glands, and panel fittings for aerospace, defence, and high-end industrial applications. The deal expands Harwin's high-reliability portfolio and extends KEC's international reach through Harwin's global sales and distribution network.

SpaceX overhauls data centre strategy with focus on resilience

SpaceX is reportedly overhauling its AI data-centre build-out to prioritise power and cooling redundancy, assigning rocket engineers to construction, according to The Information, citing sources. The shift could slow expansion. Musk is targeting orbital data centres from late 2027, despite launch-cost, maintenance, and latency hurdles.

Nokia unveils cognitive operations platform

Nokia has launched Cognitive Operations, combining mission-critical communications, edge computing, and operational AI for mining, emergency services and defence. Built around the GPU-accelerated Cognitive Edge Node, it supports video analytics, predictive maintenance, digital twins, and autonomous safety monitoring over 5G, Wi-Fi, satellite, and tactical radio networks

BPE enters UK market with OPT services partnership

NOIDA-based BPE has entered the UK market via distributor OPT Services, which will sell its UPS, battery energy storage systems, smart racks, and intelligent PDUs, initially in London and major data-centre clusters. BPE provides engineering support, while OPT handles market development and channel building.

Syrma SGS announces new facility with Elemaster Group in Bengaluru

Syrma SGS Technology and Elemaster Group have launched a 1858sqm (20,000sqft) high-reliability electronics manufacturing facility in Bengaluru's Bommasandra. With surface mount technology (SMT), through hole technology (THT), and box-build lines, it will serve railway and transportation, industrial, energy, and medical sectors, combining Syrma SGS's India-based manufacturing scale with Elemaster's engineering expertise for domestic and global OEMs.
