EMBEDDED RF ANTENNA SUPPLIERS: A Complete Guide For Indian Design Teams

From PCB and FPC antennae to custom RF solutions, Indian design teams have several options. Here is how to choose wisely.

AKANKSHA SONDHI GAUR

In modern connected products, wireless performance is only as strong as the antenna design behind it. For Indian design houses and R&D engineering teams developing IoT devices, EV systems, industrial platforms, telecom equipment, and GNSS-enabled products, selecting the right embedded RF antenna partner is a critical

TABLE 1
INDIAN OEM MANUFACTURERS

Company	Location	Embedded Focus	Custom Capability	Why Consider
Antenna Experts	New Delhi	IoT, 4G/5G, LoRa, GNSS/GPS, Bluetooth, internal, and custom embedded antennas	Moderate customisation	Strong in custom antenna development and RF engineering for specialised wireless applications
CSG Networks Pvt Ltd	Faridabad, Haryana	Primarily RF antennas and telecom RF products for GSM, CDMA, Wi-Fi, WiMAX, IBS, and two-way wireless communication	High—develops custom-built RF products, sub-assemblies, and non-standard RF designs	Strong Indian RF manufacturer and telecom system integrator with antenna design, custom RF engineering, and system integration capabilities
Eteily Technologies	Bhopal, Madhya Pradesh	IoT, 4G/5G, LoRa, GNSS, Bluetooth, internal antennas	Moderate customisation	Good option for IoT device makers needing internal antenna solutions with India sales support
Jagat RF Solutions	Gandhinagar, Gujarat	RF & microwave PCBs, antenna PCBs, telecom infrastructure, 4G/5G, MIMO	Moderate to high customisation	Strong telecom/wireless ecosystem player; rapid prototyping and engineering support for OEMs
LUISSA	New Delhi	Patch, GPS, Wi-Fi, internal antennas	Custom design available	Suitable for compact GPS/Wi-Fi embedded applications
Olnexus	New Delhi, Delhi	GSM PCB antennas, GPS patch antennas, and selected RF antenna solutions	Appears to offer RF product manufacturing and supply; custom capability should be confirmed	Broad Indian RF component and antenna supplier with PCB antenna offerings alongside GPS, GSM, Wi-Fi, LoRa, and other wireless antenna products
Raamtel Solutions	NOIDA, Uttar Pradesh	Value-added distributor and RF solution provider rather than an antenna OEM	Through partner brands	Acts as a sourcing bridge for imported embedded antennas
Smartcom Design & Solution	Bengaluru, Karnataka	Primarily custom RF antennas and microwave solutions for telecom, industrial wireless, and specialised applications; embedded antenna focus should be confirmed	High—custom antenna design, development, prototyping, and manufacturing	Strong Indian RF engineering and antenna manufacturer for projects requiring customised antenna and complete RF solutions
SRFS Teleinfra	New Delhi	GSM PCB internal antennas, sticker antennas, GSM, GPS, Wi-Fi, RFID, 3G/4G and 5G RF antennas	RF solutions and product customisation; specific embedded antenna customisation should be confirmed	Indian manufacturer with a broad RF, antenna, cable, and telecom infrastructure portfolio; relevant for both embedded/internal and wider RF antenna requirements
Synergy Telecom Pvt Ltd	New Delhi	GSM sticker antennas, internal GPS antennas, and selected compact wireless antenna solutions	RF cable assemblies and antenna solutions; custom requirements should be confirmed directly	Indian manufacturer with a broad RF and antenna portfolio, including selected internal and embedded-relevant antenna products
Torniek Technologies	Bengaluru, Karnataka	Primarily RF/microwave subsystems rather than commercial embedded IoT antennas	Yes	Better suited where embedded RF is part of a larger RF assembly
Vinsurwaves	Bengaluru, Karnataka	LTE, Wi-Fi, GSM, 5G internal antenna solutions	Yes	Good engineering interaction for integration-heavy projects
Xtragen Technologies	Bengaluru, Karnataka	GNSS, IRNSS/GPS, helix, patch, and specialised RF antennas; also RF and microwave systems	High—offers customised antenna design, development, and manufacturing	Strong Indian supplier for GNSS, navigation, aerospace, defence, and specialised RF applications, with Make-in-India antenna development capability
