

Crossbow and bolt
This SOE crossbow was powered by rubber loops that were tensioned by a windlass handle before firing. The front frame and shoulder stock could be folded for easier transportation. The bolt *(above)* was made of metal.

Welgun submachine-gun
The Welgun was a light and compact experimental submachine-gun (SMG) developed for SOE use. It had a top-folding stock and was fed from a 32-round magazine.

Webley & Scott 1907
The 1907 was one of several pistols made by Webley & Scott in the early 20th century. This model, which equipped British agents in World War II, is fitted with a silencer.

Colt and holster
This SOE gun and its holster were designed to be concealed beneath a jacket.
