

Short Term Structures

Short term structures lend up to one year. They lend for cultivation activities and provide working capital to buy seeds, fertilisers, etc. The short term structure cooperative banks have a 3 tiered set up. They are:

a. State Cooperative Bank
b. Central or District Cooperative Bank
c. Primary Agricultural Credit Societies

State Cooperative Bank (SCB)

Each state has its own State Cooperative Bank. It is the apex body for cooperative banks in a particular state. They act as a mediator or as an intermediary between RBI and NABARD on the one side and Central or District Cooperative Bank and Primary Agricultural Credit Societies on the other side. They get loans from RBI at concessional
