CHAPTER
9

Money Stock Measures[1]

- Sectorisation of the Economy
- Monetary and Liquidity Aggregates
- Annexure

Money stock refers to the total amount of money available in an economy at a particular point of time. It is also called money supply. The money supply measure is necessary because the amount and nature of money supply has a greater influence and impact on the economy.

Reserve Bank of India, the monetary authority of India, has a long tradition of publishing monetary statistics dating back to July, 1935. The method of compilation of monetary data had undergone revision threice. The methodological changes were made on the recommendation of working groups formed by the RBI. The first working group was formed in 1961 and the second working group was formed in 1977[2] (Annexure). The third working group (Working group on money supply: Analytics and Methodology of Compilation)
