$$= 12.3 - 0 \,/\, 18 - 0 = 0.6833$$

Education index

$$= 0.4266 + 0.6833/\ 2 = 0.5549$$

3. Income Index/Standard of Living Index = ln (6353) – ln (100) / ln (75000) – ln (100)

$$= 0.6271$$

HDI = $(0.7507 \times 0.5549 \times 0.6271)^{1/3} = 0.6392$

Country Groupings:

The HDR 2014 introduced fixed cut off points for grouping the countries based on the achievements. It is tabulated below category wise.

Table 3.3

Category of Human Development	Level of HDI achieved
Very High	0.800 and above
High	0.700 – 0.799
Medium	0.550 – 0.699
Low	Below 0.550

Gender Development Index

GDI measures inequality in achievement of three basic dimensions namely health, education and command over economic resources. The indicators for health and education are same as that of HDI. The India's achievement in 2017 is 0.640 and ranks 130 among 189 countries. She falls in the category of medium development.
