needs to understand this complex country as it becomes a leading power on the international stage'—Nirupama Rao, former Indian foreign secretary and ambassador to the United States and China

'Does the old international order get new India? Dhruva Jaishankar's tome traces the past and the future of India's place in the world. He calls out the outdated boxes and cliches still used for India—a stubborn inability to reflect changing realities. India is the face of a new kind of contestation in global affairs. It is pushing to reset flailing multilateral institutions even as it builds new coalitions in the Middle East, Indian Ocean and the Bay of Bengal. India is the change agent nobody saw coming'—Shekhar Gupta, editor-in-chief and chairman, ThePrint

'India's rise as a global power hasn't yet generated a body of literature that looks at the world through distinctly Indian lens. Dhruva Jaishankar has attempted to fill this gap with a study of India's strategic impulses over the ages. It is an invaluable guide to the possible choices that India could make in the twenty-first century. This book is rich in scholarship and shaped by original thinking'—Swapan Dasgupta, former member of Parliament (Rajya Sabha)
